

# VR Navigation & Controller Guide

- Movement Controls

- Forward/Backward/Strafe:
  - How to move? Use the left joystick:
    - Push forward to move ahead.
    - Push backward to move back.
    - Push left/right to strafe sideways.
- Turning/Rotation:
  - How to change perspective? Use the right joystick:
  - Push left/right to rotate your avatar.

- Speed Adjustment

- How to control movement speed?
  - Slow pace: Push the left joystick halfway forward.
  - Normal speed: Push it all the way forward.
  - Faster speed: Press down the left joystick button while pushing it fully forward.

- Button & Joystick Functions

- Left Controller
  - Joystick:
    - Movement (forward/backward/strafe).
    - Speed control: Half-push (slow), full push (normal), press + push (fast).
  - Grip Button (Left Side):
    - Used with the right grip button to pick up/hold large objects (e.g., two-handed interactions).
- Right Controller
  - Joystick: Rotate avatar left/right.
    - Trigger: Select/interact with objects (point + press).
  - Grip Button (Right Side):
    - Primary button for grabbing objects.
  - B Button: Summon Robi.
  - A Button: Start conversation with Robi.

- Handling Objects

How to Pick Up, Hold, and Drop Items

- Locate the Object:
  - Point your controller at the item (e.g., cybersecurity icons, tools).
  - A glowing outline will appear around interactable objects.
- Grab the Object:
  - Press and hold the Grip button (right or left controller) closest to the object.
  - Example: To grab a floating icon, use the right grip button.
- Hold/Adjust the Object:
  - While holding the grip button, move your controller to reposition the object.
  - For heavy/two-handed items (e.g., firewalls), use both grip buttons simultaneously.
- Drop the Object:
  - Release the grip button to drop it.
  - To place it into a specific box (e.g., "Malware" box), hover the object over the target until it highlights, then release.
- Troubleshooting Tips:
  - If the object doesn't grab:
    - Ensure your controller is pointed directly at it.
    - Check for a glowing outline (non-highlighted items can't be picked up).
  - If the object slips:
    - Hold the grip button more firmly (the system detects grip pressure).
- Interacting with Robi
  - Summon Robi:
    - Press B → Wait 1-2 seconds for Robi to materialize (usually appears in your peripheral vision).
  - Start Conversation:
    - After Robi says, "How can I help you?" speak clearly.
    - Do NOT interrupt: Robi's audio input is disabled while it's speaking.
